

ThoughtSTEM

San Diego's Premier
After School Coding Program

**CODING
FOR KIDS**

REGISTER TODAY!

2017 - 2018 FALL SESSION

Coding and Engineering

We're turning San Diego students into young inventors! Explore electronics and conductivity, while coding interactive animations and video games with drag-and-drop programming. Students will explore various engineering concepts by creating projects with lights, motors, and sensors using Arduino microcontrollers!

Whether your student is new to coding or is already a technology guru, our program offers beginner thru advanced curriculums. We believe technology is an essential component to every child's education, and our goal in every after-school program is to make technology fun, exciting, and engaging for our students. We hope you'll join us this Fall!

8 wks (9/20 - 11/15/17 | no class 11/8) | \$180

LOCATION: Notre Dame Academy
4345 Del Mar Trails Rd, San Diego, CA 92130
